Autotrader VAT Status

ClickDealer
YOUR PERFORMANCE PARTNER

When advertising a van, pickup, minibus or other LCV on Auto Trader you may receive a 'vehicle rejected due to VAT status as light commercial vehicle' error message.

In Stock	Not Published	Rejected	 VAT status required for Light Commercial Vehicles
----------	---------------	----------	--

To resolve this, navigate to the vehicle details within Click Dealer and click into the 'Sale' tab.

Here you will find the 'DE Category'; ensure this is select as 'LCV':

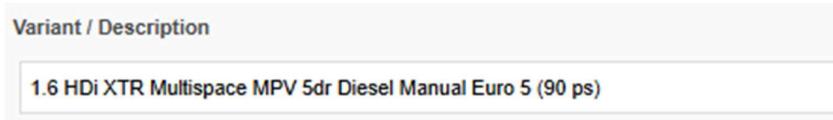

The screenshot shows a dropdown menu for 'DE Category'. The menu is titled 'DE Category' and contains a single option 'LCV' which is highlighted with a green border, indicating it is the selected category.

Once you have done this, please ensure you click 'Update Vehicle' to save the changes.

For any pickup style vehicles or minibuses, these class as crossover vehicles and will show in both car and van results on Auto Trader.

To ensure this maps correctly, navigate to the vehicle details within Click Dealer and ensure that the 'Variant/Description' contains something to the effect of 'MPV' or 'Minibus':

The screenshot shows the 'Variant / Description' field in Click Dealer. The field contains the text '1.6 HDi XTR Multispace MPV 5dr Diesel Manual Euro 5 (90 ps)', which includes the word 'MPV' to ensure correct mapping.
